Strategic Decision-Making for Executives is a 5-day course delivered by Mars Training Centre in London, Dubai, Geneva, Chicago, and Seoul — designed for senior leaders who make consequential decisions under uncertainty.

The hardest part of senior leadership is not having more information; it is making better decisions with the information available. Cognitive biases, time pressure, group dynamics, and political context all degrade decision quality at exactly the moments it matters most. This programme is built for executives who want to apply the discipline of decision science to the decisions their organisations actually face.

Across five days, you will work through frameworks for decision quality, examine how cognitive biases play out at executive level, and practise on real cases including scenarios drawn from financial services, energy, and the public sector.

What You Will Learn

By the end of this programme, you will be able to:

- Apply structured frameworks for decisions under uncertainty.
- Identify the cognitive biases most likely to degrade your own decisions.
- Distinguish decision quality from outcome quality and use both correctly.
- Lead group decisions without falling into groupthink or false consensus.
- Use data, analytics, and judgement together rather than in opposition.
- Make and communicate reversible and irreversible decisions appropriately.
- Decide under time pressure without sacrificing rigour.
- Build a personal decision-discipline practice for the 90 days after the course.

How You Will Benefit

You will leave with sharper, more defensible decisions in the moments that matter most, and a Mars Certificate of Completion.

Your organisation will gain a senior leader whose judgement the board can trust on the decisions that shape the organisation.
